BENEFITS OF SILT SOCK VS SILT FENCE

CORE Silt Socks are traditional filter socks and highly effective at removing sediment from stormwater runoff. These socks are a great replacement for silt fence, straw wattle and other sediment controls for all types of construction projects.

**THE BEST SOLUTION FOR
SEDIMENT CONTROL!**

TOTAL INSTALLED COST SAVINGS

No trenching – Minimal crew – Reduced Installation time – Easy maintenance.

INCREASES FILTRATION

Resists clogging, will not pool or pond, reducing standing water.

EASY PRODUCT TRANSPORT

Especially in difficult-to-access areas.

TRAPS SEDIMENT

And other harmful pollutants.

IDEAL FOR DIFFICULT TERRAIN

Such as rocky soils.

JOB-SITE FRIENDLY

Easier jobsite accessibility or maintenance.

EASY CLEANUP

Biodegradable, simple disposal on site.

QUALITY AND DURABILITY

Proudly produced by our production facilities in the USA!

INDUSTRIES SERVED

- Pipeline
- Solar
- Power Lines
- Construction
- Cities and municipalities
- Agriculture
- Landscaping
- Stormwater management
- Inlet protection
- Pollutant filtration
- Environmental reclamation
- Slip protection
